

**BULLETIN OF THE
ALLAHABAD MATHEMATICAL SOCIETY**

Vol. 12-13, 1997-98

CONTENTS

P. R. Parthasarathy

BIRTH AND DEATH PROCESSES AND THEIR APPLICATIONS 1-21

Abstract: The connection between birth and death processes, continued fractions, orthogonal polynomials is discussed together with applications

S. S. Dragomir and PL. Kannappam

SOME ESTIMATION OF CONVEX MAPPING IN LINEAR SPACES
ENDOWED WITH SUBINNER PRODUCTS 23-35

Abstract: Some estimation Theorems for the convex mapping defined on real linear spaces endowed with subinner products and applications for semi-inner products and inner products are given.

R. Thangadurai

SOME DIRECT AND INVERSE PROBLEMS IN ADDITIVE NUMBER
THEORY 37-55

N. Sankaran

GALOIS THEORY OF DIFFERENTIAL FIELDS - A SURVEY 57-83

V. Gaftoi, J. L. López-Bonilla, G. Ovando and J. M. R. Rivera

ASYMPTOTIC BEHAVIOR OF THE LANCZOS SPINTENSOR 85-94

Abstract: The asymptotic behavior of the Lanczos potential is studied for asymptotically flat solutions of the empty space Einstein field equations.

Bijendra Singh and M. S. Chauhan

GENERALIZATION OF BANACH'S FIXED POINT THEOREM IN
UNIFORM SPACES

95-98

Abstract: The purpose of this paper is to generalize the Banach's fixed point theorem in uniform space by taking control function ϕ .

P. K. Benerji and Deepali Sinha

ASYMPTOTIC ESTIMATION OF CERTAIN HANKEL TRANSFORM 99-102

Abstract: An asymptotic estimation of a certain class of Hankel transform is obtained.
